Homework: Data Wrangling

PLPA-5820 (Spring 2025)

Gabriel A. A. Silva

2025-03-18

Notes

I was already familiar with `tidyverse` for data wrangling.

I was not aware, however, that columns could be selected by name in ranges using the : operator.

E.g. `select(SampleID, Crop, Compartment:Fungicide, richness) %>%`
